

**National Workshop” International Rankings”. January 15th 2019. Universidad Central de las Villas (UCLV)**

La Universidad Central de las Villas "Marta Abreu" was the venue on Tuesday, January 15, of the workshop for positioning in university rankings convened by the Ministry of Education of Cuba.

The workshop was given by Juan Carlos Mejía Cuartas, Director for Latin America of QS Intelligent Unit, with the presence of María Victoria Villavicencio, Director of International Relations of the MES and Dr. C Alina Montero Torres, Director of International Relations of the UCLV.

The workshop was attended by representatives of many of the country's universities, given the importance of the good positioning of a university in a global ranking for its internationalization policies.

The World Classification of QS universities (in English, QS World University Rankings) is an annual ranking of universities of the world arranged according to hierarchy criteria. Published by Quacquarelli Symonds, it presents a sectoral classification, regional and at the same time, global.

It was a great space to exchange about the need to assess the various elements of the performance of the universities and provide with a follow-up to strengthen them.
